## **Inline Travel Agent™**

The Problem Solvers Inline Travel Agent is an inline adaptor that increases the cable pull from a brake lever to a linear pull or cable disc brake.

### **Product uses:**

The Inline Travel Agent was designed to increase the cable pull from an STI or Ergo lever so that they could be used with any non-road specific cable actuated disc brake. At the time of design, there was only one road specific mechanical disc brake that was designed to work with the cable pull of STI and Ergo levers. The Inline Travel Agent allowed Cyclocross and Tandem Road bikes to be set up with STI and Ergo levers and any non-road specific mechanical disc brake giving these riders many choices in brake compatibility. The Inline Travel Agent can also work with cantilever or STI and Ergo levers and linear pull brakes when standard Travel Agents cannot be mounted due to interference such as on a very small frame. At Problem Solvers, we keep your options open.

### **Technical details:**

- Forged and machined 6061-T6 aluminum
- Bolts into cantilever bosses or zipties to frame or fork
- Option for linear-pull brakes when standard Travel Agent cannot be mounted due to interference

### **Product number:**

BR0330 PS Inline Travel Agent
