## **Travel Agents™**

The Problem Solvers Travel Agents allow the use of any non-linear pull lever, STI or Ergo lever with any linear pull brake.

### **Product uses:**

Designed at the time when the industry was shifting from cantilever to linear pull brakes. Our Travel Agents allowed customers to keep using their expensive integrated cantilever brake shift levers while upgrading to new linear pull mountain brakes. Today, the Travel Agent still solves problems as it allows the rider to use road drop bars and road brake/shift levers and the stronger linear pull brakes. The primary segments that use this application are cyclocross and road tandems.

### **Technical details:**

- Allows non-linear pull, STI or Ergo levers to be used with linear pull brakes
- Can increase cable travel or can be used as a low friction roller to replace the noodle on linear pull brakes
- Machined and anodized 6061-T6 aluminum
- Available with or without cable adjusting barrel
